Methods to involve the stakeholders
(Authorities, Administration, Fishermen, Tourism, Business)

ARCH (IPMA):
- Presented a list of possible opportunities, risks and threats
- Promoted the discussion and corrected the list
- Asked the stakeholders to score the options (questionnaires)

Opportunities
- Bivalve Production in sand flats
- Certification of lagoon products
- Attraction various types of Tourism
- Increase Urbanism in lagoon area

Risks and threats
- Instability of inlet channel (wind and sea storms)
- Retention of sediments in the upper lagoon (runoff)
- Deficit in water renewal and loss of habitats
- Flooding the lagoon margins (climate changes?)

Future Challenges of Óbidos Lagoon (Portugal): stakeholder perspectives

Opportunities
- Bivalve Production in sand flats
- Certification of lagoon products
- Attraction various types of Tourism
- Increase Urbanism in lagoon area

Risks and threats
- Instability of inlet channel (wind and sea storms)
- Retention of sediments in the upper lagoon (runoff)
- Deficit in water renewal and loss of habitats
- Flooding the lagoon margins (climate changes?)

Professional Group with more responsibilities for the scenario

Willingness of stakeholders to stay in the region if scenario is realistic

Scenarios likely to affect the Lagoon

Professional Group with more responsibilities for the scenario

Willingness of stakeholders to stay in the region if scenario is realistic

Scenarios: A = Interruption of Lagoon-sea connection; B = Decrease of the Lagoon wet area; C = Water stagnation in the Lagoon; D = Flooding of Lagoon margins
